Fernando Galvan

Software Engineer

After years of building rapport and solid relationships as my main task, I realized I was yearning for something else: A role where I can build something meaningful and a skillset that does not depreciate over time. Since the completion of my boot camp, I have been focused on honing my skills. My eagerness has not subdued, so now I am trying to prove myself as an engineer.

Languages

Spanish

Education

2022-02 - 2022-08

Certificate: Full-Stack

General Assembly - San Antonio, TX
Built various projects, along with a few full-stack projects using JavaScript and Python. With those languages, and the concepts which make them up, I used Django, ReactJS, Node.js, NoSQL and SQL databases to add functionality to each app.

2014-01 - 2017-01

Bachelor of Science: Business Administration

Southern New Hampshire University

Work History

2021-04 - Current

Operations Manager/Specialist

New Generations Excavation, San Antonio, TX
- Audit daily work logs to mitigate discrepancies between field work and invoicing.
- Compiled data to find inefficiencies to streamline our daily procedures within the office and field.
- Coordinate with ownership to increase buying power to reduce supply and labor cost.
- Meet with all managers to set expectations for the team and home builders.

2019-10 - 2021-04

Operations Coordinator

Veryable, San Antonio, Texas
- Coordinate client projects and monitor operational performance of an on-demand platform
- Conduct market research to optimize business development; facilitate communication as internal liaison between supply, business development, and tech development departments
- Analyze user experience to identify operational gaps in business model as well as key marketing strategies
- Manage social media presence to increase brand awareness and understanding of target demographics.
